Message to our New Brunswick Manufacturers

In 1985, as our Province begins its third century, it is appropriate that we salute the past achievements of our manufacturing enterprises, and recognize their paramount importance as a generator of present and future wealth.

As our economy steadily improves, following several years of world economic stagnation, it is important that we prepare ourselves for the challenges of the future. Our manufacturing sector has emerged from these difficult years in a relatively strong position, but must continue making advances in order to remain competitive.

It is fitting for this year's directory to feature an industrial scene from the City of Saint John, as it is celebrating its bicentennial as Canada's first city. As New Brunswick's largest and leading industrial city, the future of Saint John looks bright indeed. Its shipyard has just been successful in winning a $3.8 billion contract for the management and construction of the Canadian Naval Frigate Program. In addition the city has aggressively moved forward with the redevelopment of its city core with the Market Square Complex.

This Manufacturers' Directory includes 1,356 firms which provide, at the seasonal peak, up to 49,884 jobs for our citizens. While the majority of these firms are resource based, it is encouraging to note that the greatest percentage increase in firms occurred in the food and beverage sector; also, the emergence of a small number of high technology firms offers an encouraging sign for the future.

We have made every effort to provide accurate and up-to-date information in this directory. I wish to acknowledge the responses that you, the manufacturers, have provided to our telephone inquiries and questionnaires. It is, in every sense, your directory, and I hope it serves you well.

FOREWORD

HOW TO USE THE DIRECTORY

Immediately following the foreword there is a prefatory section containing general background information relative to the Province of New Brunswick. The first part of this material consists of a thumbnail sketch of provincial geographic, demographic and economic characteristics. The second part briefly describes the New Brunswick Department of Commerce and Development and its associated agencies. Part three lists the Industrial Commissions located in New Brunswick. Part four gives a brief description of B.O.S.S. which is a further source of additional information available.

The directory itself consists of four major sections followed by two appendixes:

SECTION 1
NEW BRUNSWICK PRODUCTS — ALPHABETICAL CLASSIFICATION

Products manufactured in the province are itemized alphabetically in this section. Every product is followed by a list of the appropriate manufacturers' names. Details with respect to the manufacturers so listed are not repeated in this section, but may be readily obtained by reference to Section 2.

SECTION 2
NEW BRUNSWICK MANUFACTURERS — ALPHABETICAL CLASSIFICATION

New Brunswick manufacturers are listed alphabetically by establishment name. The name is followed by the mailing address and then the plant location when it differs from the former. After this the manager's name and telephone number are indicated. Then the Standard Industrial Classification (SIC) is listed indicating the industry/ies assigned to the establishment, the first SIC listed being the major industry, for each firm. Following is a list of products and an employment figure.

Inquiries for a listing of firms by specific industry groups will be handled by the Department of Commerce and Development upon request.

SECTION 3
NEW BRUNSWICK MANUFACTURERS — COUNTY CLASSIFICATION

The Province of New Brunswick is divided into 15 counties: Albert, Carleton, Charlotte, Gloucester, Kent, Kings, Madawaska, Northumberland, Queens, Restigouche, St. John, Sunbury, Victoria, Westmorland and York.

In this section every county constitutes a sub-section. Municipalities where manufacturing establishments may be located are listed alphabetically within each subsection. Manufacturing establishments located in each municipality are grouped alphabetically.

For suplementary reference, Appendix 2 contains a municipal population index and a map of New Brunswick indicating the 15 counties.

SECTION 4
NEW BRUNSWICK MANUFACTURERS — INDUSTRIAL PARKS CLASSIFICATION

The 35 industrial parks where manufacturing establishments are located are listed alphabetically in this section. The location of these parks is indicated and manufacturers located therein are listed alphabetically.

THE PROVINCE OF NEW BRUNSWICK

I. AN INTRODUCTORY PROFILE

LOCATION:

The Province of New Brunswick, on the Atlantic Coast of Canada, is a roughly rectangular area of about 28,000 square miles (73,500 square kilometres). Its approximate position on the map is between 45 to 48 degrees latitude, and 64 to 69 degrees longitude.

New Brunswick's capital city, Fredericton, in the southwestern part of the province, is 518 miles (829 km.) by highway from Montreal; 853 (1,368 km.) from Toronto; and 627 (1,003 km.) from New York. Flying time from the capital to Montreal is approximately 65 minutes; to Toronto, one hour 50 minutes; and to New York (via Montreal), three hours, 10 minutes.

The province's major port city, Saint John, on the Bay of Fundy in the south, is 2,338 nautical miles from Panama; 2,977 from London; 3,020 from Antwerp; and 3,176 from Hamburg.

POPULATION & LABOUR MARKET:

On April 1, 1984, New Brunswick's total population was estimated at 712,300 persons, an increase of 7,000 or 1.0 per cent over the previous year.

During 1983, New Brunswick's labour force increased at a rate of 2.8 per cent to 290,000 persons. At the same time, the number of persons employed increased 1.6 per cent to 247,000. This increase, following a significant decline in the number of employed in 1982 due to the economic recession, was nearly twice as large as that recorded by Canada (0.9 per cent). Over the 1971 to 1983 period, some 50,000 new jobs were created.

1983 LABOUR MARKET

Labour Force	290,000
Employed	247,000
Unemployment Rate	14.8%

Vast government expenditures on education during the post-war period coupled with improvements in the educational system and the increased availability of all types of industrial training programs have resulted in a labour force that is skilled, well-motivated and adaptable.

ECONOMY

The New Brunswick economy historically has been characterized by a dependence on the primary industries. Proximity to the United States, the locational advantage to year-round ice-free ports on the Atlantic Ocean and historical cultural and economic ties with Western Europe have resulted in reliance on trade in export markets.

In 1983, New Brunswick's Gross Domestic Product at Factor Cost (GDP) was estimated at a record level of over $6.7 billion. During the 1971 to 1983 period, the GDP increased at an average annual rate of 12.7 per cent. This was slightly less than the average annual rate of 13.1 per cent for Canada's Gross Domestic Product. Over this period, real GDP increased by 2.9 per cent annually in real terms (after adjustment for inflation), compared with a 3.3 per cent growth rate for Canada.

The total value of New Brunswick's exports in 1983 increased 14 per cent to $1,668 million. This represented over 25 per cent of GDP.

INDUSTRY

Although New Brunswick's industrial structure is still heavily oriented towards the extractive industries, the manufacturing sector is becoming more important as a generator of income and employment. During the 1971 to 1983 period, new capital invested in manufacturing in the province totaled nearly $2.5 billion. Major modernization programs in the pulp and paper industries as well as continued development of the food processing industries were the major contributors to manufacturing investment.

INDUSTRIAL FACTS
1983

Farm Cash Receipts	$195 million
Seafish Landings -	
Value	$ 78 million
Volume	107 thousand metric tons
Lumber Production	1,113.7 thousand cubic metres
Value of Mineral Production	$514 million
Value of Manufacturing Shipments	$3,479 million
Retail Trade	$2,719 million

Source: Statistics Canada, Various Publications

In 1983, total wages and salaries in manufacturing increased 5.9 per cent to $647 million. In addition, the value of manufacturing shipments in 1983 reached $3.4 billion, compared with $3.3 billion in 1982.

The long-term outlook for New Brunswick's manufacturing sector has been improved by the availability of government financial incentive programs which have led to a healthy sustainable manufacturing sector.

TRANSPORTATION:

In New Brunswick there are approximately 1,400 miles of arterial highways and 1,300 miles of collector roads, 95 per cent of which are hardsurfaced. The main highway system, including 380 miles of Trans-Canada Highway, links the province with the principal roads in the neighbouring provinces of Quebec and Nova Scotia, as well as the Interstate Highway System in the United States' eastern seaboard states.

New Brunswick is served by both major Canadian railways, the Canadian National Railway, and the Canadian Pacific Railway through its C P. Rail division. Both companies have additional interests in trucking, shipping and air carriers to provide a variety of services.

Several ports in New Brunswick accommodate ocean vessels; Saint John on the Bay of Fundy and Newcastle-Chatham, Bathurst, Belledune and Dalhousie on the Gulf of St. Lawrence coast of the province.

Saint John and Belledune are ice-free year round and the others are opened to navigation by icebreakers as required during the winter season.

Mainline air services are provided to New Brunswick by two carriers, Air Canada and Eastern Provincial Airways, with jet aircraft providing passenger service through five major airports. Two of these airports also handle the all-cargo flights of Air Canada. Other smaller airports are located throughout the province with several operators licensed to carry out a variety of air services.

II. DEPARTMENT OF COMMERCE AND DEVELOPMENT

AGENCIES.

The overall responsibility of the Department of Commerce and Development is the development of the manufacturing and processing sectors of the New Brunswick economy.

The Department's major objectives are:

1. To strengthen and expand the industrial base in all regions of the province.
2. To ensure the ability of provincial firms to remain competitive through improvements in productivity and product quality.
3. To diversify the industrial base through growth in new products, expanded markets and new technologies.
4. To process New Brunswick's resources and products to the highest degree possible.

These objectives are achieved through the programs and services offered by the Department.

In the area of economic assistance, the Department's Small Industry Financial Assistance Program (SIFAP) encourages and assists small industries by providing grants to establish, modernize or expand operations. Since its inception as a pilot project in 1973, SIFAP has helped to create and maintain over 4,000 jobs through assistance to more than 800 firms.

The Venture Capital Support Program, introduced in 1984, is designed to encourage the investment of venture capital in New Brunswick industries. The program offers five-year interest-free loans to venture capital firms investing in an operating company.

Potential investors in New Brunswick industries may take advantage of many other services of the Department.

Commerce and Development also offers a wide range of other services to assist industry, including management, technical and product improvement services; the development of new or expanded markets for provincially manufactured or processed products; the development of the maximum local processing of provincial resources; and program of management training seminars.

Agencies associated with the Department and reporting to the Minister of Commerce and Development are:

NEW BRUNSWICK INDUSTRIAL DEVELOPMENT BOARD — The Board, as provided for in the Commerce and Development Act, meets regularly to assess and to make recommendations on all applications for financial assistance to industry. This assistance normally takes the form of a direct loan or loan guarantee.

NEW BRUNSWICK INDUSTRIAL DEVELOPMENT APPEAL BOARD — If an application for assistance is rejected by the Development Board, the Commerce and Development Act provides for the applicant to appeal this decision. The Appeal Board hears all appeals by allowing applicants to personally appear before it.

PROVINCIAL HOLDINGS LTD. — A crown-owned corporation which holds and administers the Province's equity position in various companies, this agency may take an equity position in manufacturing and processing industries wishing to locate in New Brunswick.

III. REGIONAL ECONOMIC DEVELOPMENT COMMISSIONS

The Regional Economic Development Program provides for local participation in the economic development of each region of the province through the shared funding of autonomous Regional Economic Development Commissions.

The Regional Commissions provide an essential service in helping to identify and put into effect economic development opportunities within each region.

Functioning as independent agencies of the participating municipalities, the Commissions are in an excellent position to locate and encourage new entrepreneurs in their regions, and to support existing firms as well as assist in the delivery of other economic assistance programs.

NEED ADDITIONAL INFORMATION?

TRY B.O.S.S.

As well as compiling the information contained in this directory, the Department of Commerce and Development, in cooperation with the Federal Department of Regional Industrial Expansion and other provinces, is helping to further develop a national sourcing system called "Business Opportunities Sourcing System" (B.O.S.S.). The system is now operational and is used by federal and provincial governments, trade commissioners, Chambers of Commerce, consulting firms, etc. to assist potential buyers of Canadian products in locating appropriate manufacturers and to identify market opportunities for Canadian suppliers. B.O.S.S. incorporates the latest in information technology.

New Brunswick companies currently registered in B.O.S.S. are prefixed in this directory with the symbol "+". Expanded product descriptions and the names of company sales officials for these firms can be obtained by contacting any B.O.S.S. information centre. Such information can be obtained in Fredericton from the Department of Regional Industrial Expansion 452-3190 or the Department of Commerce and Development 453-2489.

New Brunswick manufacturers not registered with B.O.S.S. are invited to contact the Department of Commerce and Development for a registration questionnaire.
